# EscapeVR

TRAPPED ABOVE THE CLOUDS

From the creators of one of the first VR escape games ever, the first one being available in an IMAX VR Arcade, and one of few without a creepy theme, comes the second installment – this time much longer and larger.

You find yourself locked in a penthouse – in a mile high building which reaches above the clouds, but is still partly under construction. Not everything seems to be working as expected and your escape might take some effort...

Will you take on the challenge? Will you manage to escape?

Key Features

- Over 800 m^2 and 250 interactable items – *not just a single room*
- More than a dozen logical puzzles – *no rabbits conjured out of hats*
- Great visuals with hyperrealistic surfaces and interactions – *lose yourself in the game*
- Lots of tongue-in-cheek references – *even the package labels are worth a look*
- Built-in hint system – *frustration-free packaging*
